JELLY MONSTERS

Create your own 3D puzzle game!

Jelly Monsters Assets

Thanks for purchasing the Jelly Monster 3D cartoon character collection. These models are a perfect addition to any game requiring stylised, charismatic additions to enhance the player's gaming experience.

Included Directories:

- **JellyMonsters/DemoScene**: Simple demonstration of how a match style game might look like with the models set up in a grid style format. *NOTE: The demo game is NOT included in the demo set but can be obtained by purchasing the complete game template (see below)*
- **JellyMonsters/Materials:** Materials for all 5 models as well as the background template used in the demo scene.
- **JellyMonsters/Models:** The base models for each of the characters in FBX format.
- **JellyMonsters/Prefabs:** All model prefabs, with matrials assigned ready to drop straight into your game.
- **JellyMonsters/Textures:** All model textures in jpg/png format easily changed in 3rd party editors

The Jelly Monster collection is part of a larger set of models that are included in our complete game template/creation tool [Dragon Rescue 3D](). This game creation kit is perfect for anyone wanting to create their own 3D puzzle match game and features the following:

- Built-in level editor
- No 3rd party dependencies. Works as is!
- Compiles to android and iOS mobile devices "out of the box"
- Complete set of sound fx, music, models and graphics to use and extend
- Written entirely in c# with full in-line code documentation
- Complete pdf tutorial/walkthrough
- Bonus "Dragon's Breath " rocket feature
- Extra blank button materials to extend your level set
- Easily extend level set with bonus level template scene

Good luck and happy gaming!
